

ABSTRACT OF THE DISCLOSURE

ABSTRACT OF DISCLOSURE

~~This is a~~ A radio communication system having a radio base station controller ~~[[20]]~~ which is connected to a plurality of base stations ~~10n-1, 10n and 10n+1~~, and ~~then~~ assigns a fixed channel to each of ~~the~~ radio mobile stations, ~~18a, 18b and 18c~~, and The radio base station controller also ~~further~~ controls the beam patterns of the radio base stations to communicate ~~10n-1, 10n and 10n+1, and accordingly carries out the radio communications~~ with the radio mobile stations ~~18a, 18b and 18c~~. The radio base station controller ~~[[20]]~~, when transmitting to and receiving from the different radio mobile stations ~~18a, 18b and 18c~~ to which the same channel is assigned, controls the beam patterns so that the channels do not interfere with each other.
